EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

IN THE SPECIFICATION

Page 1, under the heading "RELATED APPLICATION" (see the Amendment filed September 18, 2003), " , now patent no. 6,675,619" has been inserted after "February 6, 2002".

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: One reason for allowance is that the prior art of record does not show a combination of a wheel brace with slots of generally U-shape for receiving the front rail and the rear rail and a locking device that engage the slots of the wheel brace for securing the wheel mechanism to the front and rear rails in the different operable positions. Thiele (6,367,821) shows in Figures 3A and 3B where the wheel brace 89, 55 is provided with U-shaped slots 88 having a locking device 81 for securing the wheel mechanism to the front and rear rails. However, the slots do not receive the front and rear rails. Tornabene (6,173,811) similarly shows that a locking device 52 engages the generally U-shaped slots 54 (Figure 7) to secure the wheel mechanism to the front and rear rails in the different operable positions. The slots 54 in Tornabene do not receive the front and rear rails
